

PROTECT YOUR TEAM AND CUSTOMERS FROM COMMON ILLNESS

The PathSpot Hand Hygiene System tracks and improves team handwashing by scanning hands for dangerous contaminants that spread illness.

“Having already engaged the PathSpot system well before the Coronavirus outbreak, I'm confident in how our team prioritizes handwashing and in this unprecedented environment, that priority will remain a critical focus.”

**Colin McCabe, Co-founder,
Chopt Creative Salad Co.**

Instantly Detect Harmful Contaminants

The PathSpot Hand Hygiene System detects contaminants in just two seconds. With real-time feedback on the quality of each handwash, team members safely return to work or are directed to rewash and rescan, so they can validate that contaminants were removed before anyone gets sick.

Broadcast Your Commitment to Safety

Demonstrate a commitment to hygiene and safety through PathSpot signage, messaging, PathSpot-supported PR, and other resources designed to engage customers, team members, and the public.

Meet the Demands of Employees & Customers

Investing in sanitation resources assures your employees that their workplace is a safe environment and signals to your customers that their safety is top of mind.

Data-Driven Insights

Drive measurable hygiene improvements and identify risk with unlimited access to real-time handwashing data at the team or individual level. With real-time visibility into your business operations, you can ensure your team upholds the highest level of sanitation.
