

re{image} was developed by actuaries to leverage existing digital systems to enable data-driven decision making at restaurants to increase their profits by 20% to 50%

re{image} integrates with POS terminals and banks to optimise profitability and offer financing, e.g. inventory usage & planning, demand loans and carbon credit offers.

AI optimizes decisions on:

- when to open/close,
- how much inventory to buy and when to use,
- timing of promotions,
- how many staff to use.

Also sets cash rewards for carbon credits.

Have MOU's with POS terminal providers that serve 7000+ restaurants.

Will launch in Toronto in Dec-2022 within a network of 500 Indian restaurants.

Estimated revenues of CAD\$100,000 per month.

CAD\$200 per restaurant.

Seek investment of USD\$750,000 to integrate cfo{ai} into SAP's HANA services.

SAP engine will ensure that our AI scales to millions of restaurants.

re{image} will appear on SAP product list for Banks to access and buy.

2022-2025 Roadmap:

2022 launch in Toronto will lead us to 80,000 Indian F&B across Canada/USA.

2023 Launch in Hong Kong, China and Vietnam.

SaaS fees estimated to be USD\$2,000 per year per restaurant in our network.

human intuition often causes inefficiencies

We are pre-revenue but AI is market-ready

SAP team will sell re{image} to bank CFOs

Projected USD\$10M annual profits by 2025
